Waterproof

The flysheet has been manufactured with a high-quality polyester which has an insane Hydrostatic Head rating of 4000mm. You can rest assured no water will penetrate this material, as long as there are no rips and tears. The Protex 70 Denier material is also fire retardant, so you don't need to worry about sparks and embers lighting up your tent.

Patented

The Odyssey line has a patented tensioning system named the Vango TBS II, you will see this appear in many of their models and helps to improve the stability by using a tensioning band system to pull and hold the framework in place.
